## ***Report on Review of Condensed Consolidated Interim Financial Statements***

To the Shareholders and Board of Directors of PJSC Aeroflot

### **Introduction**

We have reviewed the accompanying condensed consolidated interim statement of financial position of PJSC Aeroflot and its subsidiaries (the "Group") as of 30 June 2015 and the related condensed consolidated statements of profit or loss, comprehensive income, cash flows and changes in equity for the six-month period then ended. Management is responsible for the preparation and presentation of these condensed consolidated interim financial statements in accordance with International Accounting Standard 34, "Interim Financial Reporting". Our responsibility is to express a conclusion on these condensed consolidated interim financial statements based on our review.

### **Scope of Review**

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed consolidated interim financial statements are not prepared, in all material respects, in accordance with International Accounting Standard 34, "Interim Financial Reporting".

For the purpose of risk management the Group applies the following derivative financial instruments:

(a) *Cross-currency interest rate swaps with a fixed interest rate*

In April and May 2013, the Group entered into two cross-currency interest rate swap agreements with a Russian bank to hedge some of its Euro-denominated revenues from potential unfavourable RUB/EUR exchange rate fluctuations. As a result of efficiency test performed for this hedging instrument profit from the change in fair value of this derivative financial instrument of RUB 2,025 million was recorded within the other comprehensive income together with the corresponding deferred tax of RUB 393 million.

Level 2 market inputs in the fair value hierarchy were used to assess the fair value of the instrument. The fair value was determined based on discounted contractual cash flows using MosPrime discount rate for cash flows in roubles and EURIBOR – for Euro-denominated cash flows. Cash flows under this agreement are expected through to the end of the first quarter of 2016.

(b) *Fuel options*

As of the 30 June 2015 the Group was party to a number of option agreements concluded in 2012-2014 with Russian banks to hedge a portion of its aircraft fuel costs. Decrease in fair value of these derivative financial instruments amounted to a loss of RUB 425 million for first half of 2015, which is reported as a part of profits and losses (6 months 2014: a loss in amount of RUB 1,363 million), except for the instruments accounted by the Group under special hedging standards.

For certain fuel option agreements concluded in 2014 the Group applies cash flow hedge accounting model according to IAS 39 “Financial Instruments: Recognition and Measurement” in order to decrease exposure to volatility of cash flows from change in fuel prices.

Gain from change in fair value of option agreements to which hedge accounting is applied for 6 months 2015 amounted to RUB 4,186 million and reported in the other comprehensive income together with the corresponding deferred tax of RUB 837 million. As at 30 June 2015 effective part of cumulative loss in the amount of RUB 8,578 million before deferred income tax was recognised within hedging reserve, and ineffective part of RUB 1,595 million – within profits and losses (Note 8).

**14. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)**

As at 30 June 2015 corresponding derivative financial instruments amounting to RUB 8,171 million were recognized as current liabilities.

*(d) Currency options*

The Group entered into currency option agreements with a number of Russian banks to hedge the currency risk. The loss from the change in fair value of these derivative financial instruments in 6 months 2015 recorded within profits and losses amounted to RUB 962 million (6 months 2014: loss in amount of RUB 917 million).

*Assessment principles for currency and fuel options*

The derivative financial instruments listed below are carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivative financial instruments are included in profit or loss for the reporting period if hedge accounting is not applied. In case hedge accounting is applied the effective portion is accounted within hedge reserve.

Level 3 market inputs were used to assess the fair value of the instrument and the Monte-Carlo method was applied. The following inputs were used to assess the fair value of the options:

- spot price for basic asset oil observable in the information systems at the valuation date;
- forecast price for Brent crude oil or forecasting exchange rate determined based on the data provided by analysts for the term of the option;
- volatility calculated based on historical closing prices for underlying asset; and
- respective currency market rate (MosPrime LIBOR, EURIBOR, etc.).

For the period ended 30 June 2015, the loss on the currency and fuel options was RUB 10,361 million (6 months 2014: gain of RUB 384 million and loss of RUB 176 million on the currency and fuel options as well as under closed interest rate swap agreement).

**15. DEFERRED REVENUE RELATED TO FREQUENT FLYER PROGRAMME**

Deferred revenue and other accrued liabilities related to frequent flyer programme (Aeroflot Bonus programme) as at 30 June 2015 and 31 December 2014 represent the number of bonus miles earned when flying on the Group flights, but unused by the Aeroflot Bonus programme members and the number of promo-miles and bonus miles earned by programme members for using programme partners' services respectively, and are estimated at fair value. Deferred revenue and other accrued liabilities related to frequent flyer programme also include liabilities under the Company's discount programme as at 30 June 2015 and 31 December 2014, which represent the fair value of coupons for a discount on the repeated purchase of tickets at Aeroflot's web-site.

	<b>30 June 2015</b>	<b>31 December 2014</b>
Deferred revenue related to frequent flyer programme, current	1,148	799

Other non-current liabilities related to frequent flyer programme	3,021	3,279
<b>Total deferred revenue and other liabilities related to frequent flyer programme</b>	<b>9,465</b>	<b>8,127</b>

## 16. FINANCE LEASE LIABILITIES

The Group leases aircraft from third and related parties under finance lease agreements. The aircraft that the Group has operated under finance lease agreements as at 30 June 2015 are listed in Note 1.

	30 June 2015	31 December 2014
Total outstanding payments	155,472	170,485

Non-current finance lease liabilities	120,833	132,366
<b>Total finance lease liabilities</b>	<b>137,817</b>	<b>149,278</b>

Leased aircraft and engines with the carrying amount disclosed in Note 12 are effectively pledged for finance lease liabilities as the rights to the leased asset revert to the lessor in the event of default.

The Group hedges foreign currency risk arising on a portion of the future revenue stream denominated in US dollars with lease obligations denominated in the same currency. The Group applies cash flow hedge accounting model to this hedging transaction, in accordance with IAS 39 "Financial Instruments: Recognition and Measurement".

At 30 June 2015, finance lease liabilities in the amount of RUB 134,862 million denominated in US dollars (31 December 2014: RUB 144,059 million) are designated as a hedging instrument of highly probable revenue forecasted for the period 2015 - 2026. The Group expects that this hedging relationship will be highly effective since the future cash outflows on the lease liabilities match the future cash inflows on the revenue being hedged. At 30 June 2015, accumulated foreign currency loss of RUB 39,461 million (before deferred income tax) on the finance lease liabilities (31 December 2014: RUB 43,596 million), representing an effective portion of the hedge, is deferred in the hedging reserve. The amount reclassified from the hedging reserve to profit or loss for the reporting period was RUB 2,703 million.

**21. FAIR VALUE OF FINANCIAL INSTRUMENTS**

The estimated fair values of financial instruments have been determined by the Group using available market information, where it exists, and appropriate valuation methodologies. However, judgment is necessarily required to interpret market data to determine the estimated fair value. Management uses all available market information in estimating the fair value of financial instruments.

**Financial instruments carried at fair value.** This category includes only derivative financial instruments disclosed in Note 14. Fair value of derivative instruments is categorized as Level 2 and Level 3 in the fair value hierarchy.

Shares of JSC "MASH" are classified by the Company as investments held for sale, though as at 30 June 2015 and 31 December 2014 were accounted at historical cost of RUB 6,013 million due to inability to make fair value estimation with sufficient degree of certainty.

**21. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONITNUED)**

**Financial assets carried at amortised cost.** The fair value of instruments with a floating interest rate is normally equal to their carrying value. The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates effective on debt capital markets for new instruments with similar credit risk and remaining maturity. Carrying amounts of cash and cash equivalents, financial receivables, investments, lease security deposits and other financial assets is approximately equal to their fair value, which belongs to Level 2 in the fair value hierarchy.

**Liabilities carried at amortised cost.** The fair value of financial instruments is measured based on the current market quotes, if any. The estimated fair value of unquoted fixed interest rate instruments with stated maturity was estimated based on expected cash flows discounted at current interest rates for new instruments with similar credit risk and remaining maturity. As at 30 June 2015 and 31 December 2014, the carrying and fair values of financial payables, finance lease liabilities (Note 16) were not materially different. The fair values of loans and borrowings, including bonds, is disclosed in Note 17. The fair value of stated financial instruments is categorised as Levels 2, while bonds are categorised as Level 1 in the fair value hierarchy.

During 6 months of 2015 and 6 months 2014 there was no transfer between levels 1, 2 or 3 of the fair value hierarchy.

## **25. CONTINGENCIES**

### ***Operating Environment of the Group***

The political and economic volatility observable in the region, including the situation in Ukraine have had and may continue to have a negative impact on the Russian economy, including weakening of the Russian Rouble and making it harder to raise international funding. At present, there is an ongoing threat of additional sanctions against Russian Federation and some companies incorporated in Russia, and their officials. The financial markets are uncertain and volatile. These and other events may have an impact on the Group's operations and financial position. Effect of these sanctions is not significant by management's assessment. The Group continues to monitor the situation and executes set of measures to minimize influence of possible risks on operating activity of the Group and its financial position.

The Group's operations are primarily located in the RF. Consequently, the Group is exposed to the risk of the economic and financial markets of the RF which display characteristics of an emerging market. The legal and tax frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in the RF. These condensed consolidated interim financial statements reflect assessment of the Group's management of the impact of the Russian business environment on the operations and the financial position of the Group. The future business environment may differ from management's assessment.

As at 30 June 2015 the Group net current liabilities amounted to RUB 50,258 million (31 December 2014: RUB 42,923 million). As a result of operations for 6 months 2015 the Group showed net loss in the amount of RUB 3,541 million (6 months 2014: net loss RUB 1,905 million). Cash flows from operating activities for 6 months 2015 was positive and amounted to RUB 42,736 million (6 months 2014: RUB 26,603 million).

The treasury of the Group provides flexibility of financing by availability of credit lines. As at 30 June 2015 the Group was able to attract RUB 23,084 million of cash (31 December 2014: RUB 21,562 million) available under existing credit lines granted to the Group by various lending institutions. To improve liquidity Management is planning an improvement of the Group's operating performance and further growth of cash-flows from operating activity.

### ***Seasonality***

Business activities of the Group with respect to international and domestic passenger and cargo flights are subject to season fluctuations, peak of demand occurs in the second and third quarters of a year.

**25. CONTINGENCIES (CONTINUED)*****Tax contingencies***

The taxation system in the RF continues to evolve and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are sometimes fuzzy and contradictory and subject to varying interpretation by different tax authorities. Taxes are subject to audit and investigation by a number of authorities, which have the authority to impose severe fines and penalties charges. A tax year remains open for review by the tax authorities during the three subsequent calendar years; however, under certain circumstances a tax year may remain open longer. Recent events within the RF suggest that the tax authorities are taking a more tough stance in their interpretation and enforcement of tax legislation.

These circumstances may create tax risks in the RF that are substantially more significant than in other countries. The Group's management believes that it has provided adequately for tax liabilities in these condensed consolidated interim financial statements based on its interpretations of applicable Russian tax legislation, official pronouncements and court decisions. However, the interpretations of these provisions by the relevant authorities could differ and the effect on these condensed consolidated interim financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

Russian revised transfer pricing legislation is effective from 1 January 2012. The new transfer pricing rules appear to be more technically elaborate and, to a certain extent, better aligned with the international transfer pricing principles developed by the Organisation for Economic Cooperation and Development. The Group's management prepared transfer pricing documentation to comply with the new legislation and believes that its pricing policy and implemented internal procedures are adequate to meet the new transfer pricing legal requirements. Changes in tax legislation or its enforcement in relation to such issues as transfer pricing may lead to an increase in the Group's effective income tax rate.

As of 30 June 2015 and 31 December 2014 the Management believes the Group has no other significant possible obligations from exposure to other than remote tax risks, which possibility is estimated as "more, than a minor".

***Insurance***

The Group maintains insurance in accordance with the legislation. In addition, the Group insures risks under various voluntary insurance programs, including management's liability, Group's liability and risks of loss of aircraft under operating and finance lease.

***Litigation***

During the reporting period the Group was involved (both as a plaintiff and a defendant) in a number of court proceedings arising in the ordinary course of business. Management believes that there are no current court proceedings or other claims outstanding which could have a material effect on the results of operations and financial position of the Group.
