Report on Review of Consolidated Interim Condensed Financial Statements

To the Shareholders and Board of Directors of PJSC Tatneft:

Introduction

We have reviewed the accompanying consolidated interim condensed statement of financial position of PJSC Tatneft and its subsidiaries (together – the “Group”) as at 31 March 2020 and the related consolidated interim condensed statements of profit or loss and other comprehensive income, changes in equity and cash flows for the three-month period then ended, and the related explanatory notes. Management is responsible for the preparation and presentation of these consolidated interim condensed financial statements in accordance with International Accounting Standard 34, “Interim Financial Reporting”. Our responsibility is to express a conclusion on these consolidated interim condensed financial statements based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of consolidated interim condensed financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim condensed financial statements are not prepared, in all material respects, in accordance with International Accounting Standard 34, “Interim Financial Reporting”.

Note 1: Organisation

PJSC Tatneft (the “Company”) and its subsidiaries (jointly referred to as the “Group”) are engaged in crude oil exploration, development and production principally in the Republic of Tatarstan (“Tatarstan”), a republic within the Russian Federation. The Group also engages in refining of crude oil and associated petroleum gas processing, marketing of crude oil and refined products as well as production and marketing of petrochemicals, and since October 2016, with the acquisition of controlling interest in PJSC Bank ZENIT, including its subsidiaries (jointly referred to as “Bank ZENIT”), the Group is also engaged in banking activities.

The Company was incorporated as an open joint stock company (now referred to as a public joint stock company) effective 1 January 1994 (the “privatization date”) pursuant to the approval of the State Property Management Committee of the Republic of Tatarstan. All assets and liabilities previously managed by the production association Tatneft, Bugulminsky Mechanical Plant, Menzelinsky Exploratory Drilling Department and Bavlinsky Drilling Department were transferred to the Company at their book value at the privatization date in accordance with Decree of the President of the Russian Federation No. 1403 on Privatization and Restructuring of Enterprises and Corporations into Joint-Stock Companies. Such transfers were considered transfers between entities under common control at the privatization date, and were recorded at book value.

The Group does not have an ultimate controlling party.

As of 31 March 2020 and 31 December 2019 the government of Tatarstan controls about 36% of the Company’s voting stock. Tatarstan also holds a “Golden Share”, a special governmental right, in the Company. The exercise of its powers under the Golden Share enables the Tatarstan government to appoint one representative to the Board of Directors and one representative to the Revision Committee of the Company as well as to veto certain major decisions, including those relating to changes in the share capital, amendments to the Charter, liquidation or reorganization of the Company and “major” and “interested party” transactions as defined under Russian law. The Golden Share currently has an indefinite term. The Tatarstan government also controls or exercises significant influence over a number of the Group’s suppliers and contractors.

The Company is domiciled in the Russian Federation. The address of its registered office is Lenina St., 75, Almeteyevsk, Republic of Tatarstan, Russian Federation.

Note 2: Basis of preparation

The consolidated interim condensed financial statements have been prepared in accordance with IAS 34 “Interim Financial Reporting”. The consolidated interim condensed financial statements should be read in conjunction with the annual consolidated financial statements for the year ended 31 December 2019, which have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

These consolidated interim condensed financial statements are unaudited and do not include all the information and disclosures required in the annual IFRS financial statements. The Company omitted disclosures which would substantially duplicate the disclosures contained in its 2019 audited consolidated financial statements, such as accounting policies and details of accounts which have not changed significantly in amount or composition. Management believes that the disclosures are adequate to make the information presented not misleading if these consolidated interim condensed financial statements are read in conjunction with the Group’s 2019 audited consolidated financial statements and the notes related thereto. In the opinion of the Group’s management, the unaudited consolidated interim condensed financial statements and notes thereto reflect the known adjustments, all of which are of a normal and recurring nature, necessary to fairly state the Group’s financial position, results of operations and cash flows for the interim periods.

The entities of the Group maintain their accounting records and prepare their statutory financial statements principally in accordance with the Regulations on Accounting and Reporting of the Russian Federation (“RAR”), and applicable accounting and reporting standards of countries outside the Russian Federation. A number of entities of the Group prepare their financial statements in accordance with IFRS. The accompanying consolidated interim financial statements have been prepared from these accounting records and adjusted as necessary to comply with IFRS. The principal differences between RAR and IFRS relate to: (1) valuation (including indexation for the effect of hyperinflation in the Russian Federation through 2002) and depreciation of property, plant and equipment; (2) foreign currency translation; (3) deferred income taxes; (4) valuation allowances for unrecoverable assets; (5) consolidation; (6) accounting for oil and gas properties; (7) recognition and disclosure of guarantees, contingencies and commitments; (8) accounting for decommissioning provision; (9) pensions and other post-retirement benefits; (10) business combinations and goodwill and (11) lease liabilities and right-of-use assets recognition.

The accounting policies used in preparing these consolidated interim financial statements were the same as those that applied to the consolidated financial statements for the previous financial year.

Note 2: Basis of preparation (continued)

Use of estimates in the preparation of financial statements. The Group makes estimates and assumptions that affect the amounts recognised in the financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgements that have the most significant effect on the amounts recognised in the consolidated interim condensed financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

- Estimation of oil and gas reserves;
- Useful life of property, plant and equipment;
- Decommissioning provisions;
- Impairment of property, plant and equipment;
- Accounting of investments in JSC "National Non-State Pension Fund";
- Presentation of Revenue net of excise tax, including reverse excise;
- Sale and purchase of oil under counter oil supply agreement;
- Financial assets impairment;
- Financial assets classification;
- Financial instruments fair value estimation.

In preparing these consolidated interim condensed financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2019, except for sale and purchase of crude oil under counter supply agreement and Impairment of property, plant and equipment.

Sale and purchase of crude oil under counter supply agreement. For the three months ended 31 March 2020, the sale and purchase of crude oil under a counter supply agreement in the amount of RR 12,832 million and RR 12,636 million respectively, are presented net in the consolidated interim condensed statement of profit and loss and other comprehensive income of the Group in accordance with the IFRS 15 requirements for the similar quality products exchange. In 2019, no such operations were carried out.

Impairment of property, plant and equipment. As at 31 March 2020 management assessed whether there is any indication of impairment of non-current assets. Due to indications of possible impairment, the Group performed impairment tests (Note 10).

Income Taxes. Income tax expense is recognized based on management estimates and assumptions regarding the income tax rate expected for the full financial year and profit before income tax formed in the interim period.

Functional and Presentation Currency. The presentation currency of the Group is the Russian Ruble.

Management has determined the functional currency for each consolidated subsidiary of the Group, except for subsidiaries located outside of the Russian Federation, is the Russian Ruble because the majority of Group revenues, costs, property and equipment purchased, debt and trade liabilities are either priced, incurred, payable or otherwise measured in Russian Rubles. Accordingly, transactions and balances not measured in Russian Rubles (primarily US Dollars) have been re-measured into Russian Rubles in accordance with the relevant provisions of IAS 21 "The Effects of Changes in Foreign Exchange Rates".

For operations of major subsidiaries located outside of the Russian Federation, that primarily use US Dollar as the functional currency, adjustments resulting from translating foreign functional currency assets and liabilities into Russian Rubles are recorded in a separate component of shareholders' equity entitled foreign currency translation adjustments. Revenues, expenses and cash flows are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions).

The official rate of exchange, as published by the Central Bank of Russian Federation ("CB RF"), of the Russian Ruble ("RR") to the US Dollar ("US \$") at 31 March 2020 and 31 December 2019 was RR 77.73 and RR 61.91 to US \$, respectively. Average rate of exchange for the three months ended 31 March 2020 and 31 March 2019 were RR 66.38 and RR 66.13 per US \$, respectively.

Note 3: Adoption of new or revised standards and interpretations

The following amended standards became effective for the Group from 1 January 2020, but did not have any material impact on the Group:

- Amendments to the Conceptual Framework for Financial Reporting (issued on 29 March 2018 and effective for annual periods beginning on or after 1 January 2020).
- Definition of a business – Amendments to IFRS 3 (issued on 22 October 2018 and effective for acquisitions from the beginning of annual reporting period that starts on or after 1 January 2020). The amendments revise definition of a business.
- Definition of materiality – Amendments to IAS 1 and IAS 8 (issued on 31 October 2018 and effective for annual periods beginning on or after 1 January 2020). The amendments clarify the definition of material and how it should be applied by including in the definition guidance that until now has featured elsewhere in IFRS. In addition, the explanations accompanying the definition have been improved.
- Interest rate benchmark reform - Amendments to IFRS 9, IAS 39 and IFRS 7 (issued on 26 September 2019 and effective for annual periods beginning on or after 1 January 2020).

Certain new standards, interpretations and amendments to standards have been issued that are mandatory for the annual periods beginning on or after 1 January 2021 or later, and which the Group has not early adopted. The full list of such standards, interpretations and amendments to standards was disclosed in the consolidated financial statements as of and for the year ended 31 December 2019. The following amendments to existing standards have been issued since the Group published its last annual consolidated financial statements:

- Annual Improvements to IFRSs 2018-2020 - amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41 and narrow scope amendments to IAS 16, IAS 37 and IFRS 3 (issued on 14 May 2020 and effective for annual periods beginning on or after 1 January 2022).

The Group does not expect that these amendments will have any material impact on its consolidated financial statements.

Note 4: Cash and cash equivalents

Cash and cash equivalents comprise the following:

	At 31 March 2020	At 31 December 2019
Cash on hand and in banks	42,171	24,730
Term deposits with original maturity of less than three months	449	350
Due from banks	125	77
Total cash and cash equivalents	42,745	25,157

Term deposits with original maturity of less than three months represent deposits placed in banks in the course of non-banking activities. Due from banks represent deposits with original maturities of less than three months placed in the course of banking activities in banks other than those that are part of the Group. The estimated fair value of cash and cash equivalents approximates their carrying value (Note 21).

Total long-term financial assets	68,256	80,578

The fair value of financial assets and valuation techniques used are disclosed in Note 21.

In December 2018 the Group entered into a transaction to acquire from a number of Russian government-controlled banks their rights of claim under the credit facilities with NEFIS Group, a leading Russian household chemicals, oil and fats manufacturer. Total rights in the amount of RR 19,408 million and RR 19,861 million were accounted as other loans in other long-term financial assets carried at amortised cost at 31 March 2020 and 31 December 2019 respectively.

Corporate bonds consist of Russian Ruble and US Dollar denominated bonds and Eurobonds issued by Russian banks and companies.

Federal loan bonds consist of Russian Ruble denominated government securities issued by the Ministry of Finance of the Russian Federation, which are commonly referred to as “OFZ” and Russian Federation Eurobonds.

Municipal bonds consist of Russian Ruble denominated bonds issued by regional and municipal authorities of the Russian Federation.

Corporate shares at FVTPL include quoted and unquoted shares of Russian companies and banks. As at 31 March 2020 and 31 December 2019 unquoted securities measured at fair value through other comprehensive income include investment in AK BARS Bank ordinary shares (17.24%) in the amount of RR 7,300 million.

Investment fund units are solely presented with investment in closed mutual investment rental fund AK BARS – Gorizont (45.45% of the total amount a shares). The main assets of this fund are the land plots located in Tatarstan Republic. The Group does not exercise significant influence over this investment and therefore accounts for it as a financial asset measured at fair value through other comprehensive income.

Due to indications of possible impairment as at 31 March 2020 the Group conducted impairment testing for the main groups of assets. According accounting policy, individual assets are grouped for impairment purposes to the cash generating units (CGU) at the lowest level for which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets:

- field-by-field basis for exploration and production assets;
- entire complex level for refining assets;
- individual petrol station level;
- entire factory level for tire production assets;
- complex level for the energy production assets.

Note 10: Property, plant and equipment (continued)

The macroeconomic factors, including but not limited to the reduction in oil production, crude oil and oil products prices fall, the volatility of the Russian Ruble to the US dollar and a decrease in the level of business activity were taken into account when preparing models, which are the main source of information for measuring the value in use of non-current assets, including forecasts of oil production and refining volumes, oil and oil products price dynamics, petrochemical production forecast, as well as when determining the discount rate.

In assessing impairment, the recorded value of assets was compared with the estimated value in use of the CGUs. The value in use is determined as the discounted net cash flows based on the forecasts of Revenue, production costs and changes in working capital based on confirmed long-term strategic plans of the Group, taking into account the impact of the pandemic and accepted restrictions on the uncertainty in the period of recovery in demand and profitability. The forecasting period for determining the value in use is in line with the management assumptions used for long-term strategy and does not exceed the useful life of assets included in the CGUs.

As at 31 March 2020 the Group recognised impairment of the following assets:

- assets used in the production of tire products of the Petrochemicals segment in the amount of RR 3,373 million;
- exploration and evaluation assets related to the oilfields located outside the Republic of Tatarstan in the amount of RR 1,159 million, due to adverse conditions in the oil market affecting the current assessment of respective projects, for these projects, an impairment loss was previously recognized as at 31 December 2019;
- other assets, including social assets, in the total amount of RR 1,351 million, which are not providing future economic benefits.

An impairment loss is included in the corresponding line of the consolidated interim condensed statement of profit or loss and other comprehensive income.

Key assumptions applied to the calculation of value in use are follows:

- the discount rate set as 11,83% calculated based on the Company's weighted average cost of capital adjusted for asset specific risks;
- oil prices, oil product spreads and US dollar / Russian ruble exchange rates are based on available forecasts from globally recognized research institutions;
- Estimated production and refining volumes were based on detailed information for the production and refining plans approved by management as part of the long-term strategy, considering the decrease in business activity as a result of the COVID-19 pandemic and the OPEC + agreement terms.

A reasonably justified change in key assumptions, taken into account by management for the purpose of preparing models as at the reporting date, does not necessitate the recognition of an additional impairment other than the above.

The following table summarizes changes in the Group's decommissioning provision for the three months ended 31 March 2020 and 31 March 2019:

	Three months ended 31 March 2020	Three months ended 31 March 2019
Balance at the beginning of period	50 474	34,457
Unwinding of discount	844	751
Changes in estimates	(8 102)	-
Balance at the end of period	43,216	35,208
Less: current portion of decommissioning provisions (Note 13)	(128)	(119)
Long-term balance at the end of period	43,088	35,089

For the three months ended 31 March 2020 the Group recorded the change in estimate for oil and gas properties decommissioning primarily due to the change in discount rate (for three months ended 31 March 2019: not applicable). In assessing the current portion of decommissioning provision the following key assumptions were applied.

	At 31 March 2020	At 31 December 2019
Discount rate	7.26%	6.69%
Inflation rate	4.00%	4.00%

Credit facilities. In November 2011, TANECO entered into a US \$75 million credit facility with equal semi-annual repayments during ten years. The loan was arranged by Nordea Bank AB (Publ), Société Générale and Sumitomo Mitsui Banking Corporation Europe Limited. The loan bears interest at LIBOR plus 1.1% per annum. The loan agreement requires compliance with certain financial covenants including, but not limited to, minimum levels of consolidated tangible net worth and interest coverage ratios.

In November 2011, TANECO entered into a US \$144.5 million credit facility with equal semi-annual repayments during ten years with the first repayment date on 15 May, 2014. The loan was arranged by Société Générale, Sumitomo Mitsui Banking Corporation Europe Limited and the Bank of Tokyo-Mitsubishi UFJ LTD. The loan bears interest at LIBOR plus 1.25% per annum. The loan agreement requires compliance with certain financial covenants including, but not limited to, minimum levels of consolidated tangible net worth and interest coverage ratios.

In May 2013, TANECO entered into a Euro 55 million credit facility with equal semi-annual repayment during ten years. The loan was arranged by The Royal Bank of Scotland plc and Sumitomo Mitsui Banking Corporation Europe Limited. The loan bears interest at LIBOR plus 1.5% per annum. In accordance with credit facility terms repayment of the debt is performed in USD. The loan agreement requires compliance with certain financial covenants including, but not limited to, minimum levels of consolidated tangible net worth and interest coverage ratios. In May 2016 this credit facility was assigned to Citibank Europe plc, UK Branch with credit facility details remaining.

In March 2020, the Group obtained waiver of early repayment according which credit facilities of TANECO were recorded as long-term debt as of 31 March 2020.

In first quarter 2020 the Group received short-term loans under the credit facilities with PJSC Sberbank, AO ALFA-BANK, PJSC Bank Otkrytie FC and PJSC ROSBANK in total amount of RR 101,960 million at rates ranging from 6.10% to 6.74%, most of which were repaid early. The debt at 31 March 2020 amounted of RR 29,640 million and were repaid in the second quarter 2020.

During 2019, the Group received short-term loans under the credit facilities with PJSC Sberbank, AO ALFA-BANK, PJSC Bank Otkrytie FC and PJSC MOSCOW CREDIT BANK in total amount of RR 113,200 million at rates ranging from 6.33% to 8.54%, which were repaid early. The debt at 31 December 2019 amounted to RR 10,142 million and were repaid in January 2020.

Bonds issued. In December 2019 the Company issued Russian Ruble denominated bonds in the amount of RR 15,000 million with the maturity in 3 years at a rate of 6.45% per annum.

Note 12: Debt (continued)

At 31 March 2020 and at 31 December 2019 bonds issued include bonds denominated in Russian Rubles issued by Bank ZENIT amounted RR 9,247 million and RR 6,857 million respectively, that mature between 2020 and 2025. At 31 March 2020 and at 31 December 2019 the annual coupon rates on these securities range from 6.65% to 7.96% and 7% to 8.85% respectively (excluding bonds issued on emission BO-13 at amount RR 1 million and coupon rate 0.1%). The majority of bonds, issued by Bank ZENIT, allow early repurchase at the request of the bond holder as set in the respective offering documents.

Subordinated debt. At 31 March 2020 and 31 December 2019 subordinated debt is presented by one subordinated loans raised by Bank ZENIT respectively (excluding subordinated debt under the direct repurchase agreement with Deposit Insurance Agency (DIA). At 31 March 2020 and at 31 December 2019 the subordinated debt bears interest at the rate 9.9% and 8.9% respectively and matures in 2024.

Bank ZENIT is obliged to comply with eight financial covenants in relation to the subordinated loan maturing in December 2024. At 31 December 2019 Bank ZENIT was in compliance with these covenants, except one (Cost-to-income ratio). At 30 June 2019 Bank ZENIT did not comply with two covenants (Cost-to-income ratio and Liquid assets to Total assets). This violation does not entail claims for early repayment of the subordinated loan. Failure to comply with these covenants may result in a deterioration of the commercial terms of the loan in the event of failure to obtain a waiver from the lender. At 30 June 2019 the lender granted Bank ZENIT a waiver until 1 March 2020. Starting from 1 March 2020 Bank ZENIT pays a higher interest rate until the violation is rectified or a new waiver is received. At 31 March 2020 Bank ZENIT did not assess its compliance with these covenants, since Bank ZENIT is obliged to calculate them on a semi-annual basis only.

In September 2015 Bank ZENIT received five subordinated loans totalling RR 9,933 million from DIA within the Russian Federation Government programme for additional capitalisation of Russian banks. Under the terms of these subordinated loan agreements DIA paid these loans by securities (OFZ of five series), that should be returned upon maturity of the subordinated loans. These subordinated loans mature from January 2025 to November 2034 and bear interest equal to OFZ coupon rate plus 1%. In accordance with IFRS 9 and IAS 39 if securities are loaned under an agreement to return them to the transferor, they are not derecognised because the transferor retains substantially all the risks and rewards of ownership. Accordingly, the obligation to return the securities should not be recognised. Therefore, OFZ and the subordinated loan received from DIA are not recognised within assets and liabilities in the consolidated statement of financial position. These subordinated loans are accounted for in capital adequacy ratio calculation in accordance with Bank of Russia's Regulation No. 395-P.

Debt securities issued. At 31 March 2020 debt securities are promissory notes issued by Bank ZENIT at a discount to nominal value and interest bearing promissory notes denominated in Russian Rubles (at 31 December 2019: in Russian Rubles and US Dollars). Maturity dates of these promissory notes vary from 2020 to 2028.

At 31 March 2020 and at 31 December 2019 non-interest-bearing promissory notes of the aggregate nominal value of RR 225 million and RR 641 million respectively were issued by Bank ZENIT for settlement purposes and mature primarily on demand.

Note 18: Segment information

Operating segments are components that engage in business activities that may earn revenues or incur expenses, whose operating results are regularly reviewed by the Board of Directors and the Management Committee and for which discrete financial information is available.

Segments whose revenue, result or assets are ten percent or more of all the segments are reported separately.

The Group's business activities are conducted predominantly through four main operating segments:

- Exploration and production consists of exploration, development, extraction and sale of own crude oil. Intersegment sales consist of transfer of crude oil to refinery and other goods and services provided to other operating segments;
- Refining and marketing comprises purchases and sales of crude oil and refined products from third parties, as well as crude oil and gas processing and the sale of oil and gas products in bulk and through its own petrol stations network;
- Petrochemical products include production and sales of tires, technical carbon;
- Banking segment includes operations of Banking Group ZENIT.

Other sales include revenues from ancillary services provided by the specialised subdivisions and subsidiaries of the Group, such as sales of oilfield equipment, revenues from the sale of auxiliary petrochemical related services and materials as well as other business activities, which do not constitute reportable business segments.

The Group evaluates performance of its reportable operating segments and allocates resources based on segment earnings, defined as profit before income tax not including interest income, expense on non-banking activities, and gains from equity investments, other income (expenses) and foreign exchange loss or gain. Intersegment sales are at prices that approximate market. Group financing (including interest expense and interest income on non-banking activities) and income taxes are managed on a Group basis and are not allocated to operating segments.

Note 19: Related party transactions

Parties are generally considered to be related if the parties are under common control or if one party has the ability to control the other party or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Transactions are entered into in the normal course of business with associates, joint ventures, government related companies, key management personnel and other related parties. These transactions include sales and purchases of refined products, purchases of electricity, transportation services and banking transactions. The Group enters into transactions with related parties based on market or regulated prices.

Note 20: Contingencies and commitments**Operating Environment of the Group**

The Russian Federation displays certain characteristics of an emerging market. Its economy is particularly sensitive to oil and gas prices and subject to significant negative impact of continuous decrease in crude oil prices.

In March 2020 the World Health Organization announced a pandemic due to the rapid spread of COVID-19. The measures taken around the world to combat the spread of COVID-19 resulted in limitation of business activity, which caused significant decrease in world demand for energy resources. The expiration of prior arrangement of OPEC+ on April 1, 2020 raised the risks of substantial oversupply of crude oil and refined products in the market. These events led to significant drop in stock markets, fall in crude oil prices, the Russian Ruble weakened against the US dollar and the Euro. Despite the new production restrictions agreed by OPEC+, the recovery in oil prices may take a long time and may be accompanied by a significant reduction in oil production. These events can have a significant impact on the operations, financial position and financial results of the Group in the future, the consequences of which are difficult to predict. Management created reserves for impairment considering the economic situation and prospects at the end of the reporting period.

Tax, currency and customs legislation is sometimes subject to varying interpretations and contributes to the challenges faced by companies operating in the Russian Federation. The Russian economy continues to be negatively impacted by ongoing political tension in the region and international sanctions against certain Russian companies and individuals. The future economic development of the Russian Federation depends on external factors and internal measures taken by the government and changes in the tax, legal and regulatory framework.

Continued uncertainty regarding further economic growth, volatility in the financial markets, lower global oil prices, reduced oil production, as well as other risks, could have a significant negative impact on the financial and corporate sectors of the Russian economy in the future. Management believes it is taking all necessary measures to support the sustainability and development of the Group's business in the current business and economic environment. As with any economic forecast, however, the projections and likelihoods of their occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different from those projected.

Capital commitments. As at 31 March 2020 and at 31 December 2019 the Group has outstanding capital commitments of RR 58,537 million and RR 46,804 million, respectively, mainly for the construction of the TANECO refinery complex, drilling and construction of wells, superviscous oil fields facilities construction and tire business development project. These commitments are expected to be paid between 2020 and 2024.

Management believes the Group's current and long-term capital expenditures program can be funded through cash flows generated from existing operations as well as lines of credit available to the Company. The TANECO refinery project has been funded from the Company's cash flow with the support of the bank facilities (Note 12).

Management believes the Company has the ability to obtain syndicated loans and other financings as needed to continue funding the own projects, refinance any maturing debts as well as finance business acquisitions and other transactions that may arise in the future.

Note 20: Contingencies and commitments (continued)

Credit related commitments. The credit related commitments comprise loan commitments, letters of credit and guarantees. The contractual commitments represent the value at risk should the contract be fully drawn upon, the client defaults, and the value of any existing collateral becomes worthless. In general, certain part of Group's import letters of credit are collateralised with cash deposits or collateral pledged to the Group and accordingly the Group normally assumes minimal risk.

Outstanding credit related commitments are as follows:

	At 31 March 2020	At 31 December 2019
Undrawn credit lines that are irrevocable or are revocable only in response to a material adverse change	29,384	28,973
Guarantees issued	12,042	12,739
Import letters of credit	266	129
Less: allowance for credit related commitment	(375)	(324)
Less: commitments collateralised by cash deposits under guarantees issued	(19)	(19)
Less: commitments collateralised by cash deposits under import letters of credit	(266)	(130)
Total credit related commitments	41,032	41,368

Taxation. The Russian tax legislation is subject to varying interpretations and changes which can occur frequently. Management's interpretation of the legislation, as applied to the transactions and activities, may be challenged by the tax authorities.

The tax authorities may take a different position in their interpretation of the legislation, and it is possible that transactions and activities that have not been challenged in the past may be challenged.

The Russian transfer pricing legislation is generally aligned with the international transfer pricing principles developed by the Organisation for Economic Cooperation and Development (OECD), with certain specific features. This legislation allows tax authorities to assess additional taxes for controllable transactions (transactions between related parties and certain transactions between unrelated parties) if such transactions are not on an arm's length basis.

Tax liabilities arising from intercompany transactions are determined using actual transaction prices. It is possible, with the evolution of the interpretation of the transfer pricing rules, that such prices could be challenged. Management believes that its pricing policy is arm's length and it has implemented internal processes to be in compliance with the new transfer pricing legislation. The Group believes that its interpretation of the new legislation is appropriate and the Group's tax position will be sustained.

Environmental contingencies. The Group, through its predecessor entities, has operated in Tatarstan for many years without developed environmental laws, regulations and the Group's policies. Environmental regulations and their enforcement are currently being considered in the Russian Federation and the Group is monitoring its potential obligations related thereto. The outcome of environmental liabilities under proposed or any future environmental legislation cannot reasonably be estimated at present, but could be material. Under existing legislation, however, management believes that there are no probable liabilities, which would have a material adverse effect on the operating results or financial position of the Group. In addition, the Group is introducing and applying best health, safety and environmental protection practices and standards which might go beyond any existing and potential legal requirements in the Russian Federation.

Legal contingencies. The Group is subject to various lawsuits and claims arising in the ordinary course of business. The outcomes of such contingencies, lawsuits or other proceedings cannot be determined at present. In the case of all known contingencies the Group accrues a liability when the loss is probable and the amount is reasonably estimable. Based on currently available information, management believes that it is remote that future costs related to known contingent liability exposures would have a material adverse impact on the Group's consolidated financial statements.

Social commitments. The Group contributes significantly to the maintenance of local infrastructure and the welfare of its employees within Tatarstan, which includes contributions towards the construction, development and maintenance of housing, hospitals and transport services, recreation and other social needs. Such funding is periodically determined by the Board of Directors after consultation with governmental authorities and recorded as expenditures when incurred.

Note 20: Contingencies and commitments (continued)

Transportation of crude oil. The Group transports substantially all of the crude oil that it sells in export and local markets through trunk pipelines in Russia that are controlled by Transneft, the state-owned monopoly owner and operator of Russia's trunk crude oil pipelines. The Group's crude oil is blended in the Transneft pipeline system with other crude oil of varying qualities to produce an export blend commonly referred to as Urals. There is currently no equalization scheme for differences in crude oil quality within the Transneft pipeline system and the implementation of any such scheme or the impact of it on the Group's business is not currently determinable.

Note 21: Fair values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an ordinary transaction between market participants at the measurement date. The estimated fair values of financial instruments are determined with reference to various market information and other valuation techniques as considered appropriate.

The different levels of fair value hierarchy have been defined as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities that Group has the ability to assess at the measurement date.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 – Unobservable inputs for the asset or liability. These inputs reflect the Group's own assumptions about the assumptions a market participant would use in pricing the asset or liability.

Recurring fair value measurements

The levels in the fair value hierarchy into which the recurring fair value measurements are categorised are as follows:

Note 21: Fair values (continued)

The fair values in Level 2 fair value hierarchy were estimated using the discounted contractual cash flows and observable interest rates for identical instruments. The fair values in Level 3 fair value hierarchy were estimated using the discounted cash flows and observable interest rates for similar instruments with adjustment to credit risk and maturity.

Note 22: Subsequent events

In 2 quarter 2020 the Group borrowed RR 30,190 million in total from Russian banks at the current market rates under existing lines of credit arrangements. The Group repaid RR 14,830 millions of these loans by the date of this report.

In April 2020 the OPEC+ member countries reached an agreement under which the Russian Federation committed to reduce oil production starting 1 May 2020 till 30 April 2022. In accordance with the agreements reached, the Group begins to fulfill its obligations to reduce oil production. However, due to the general decline in demand caused by the COVID-19 pandemic, and further uncertainty regarding the expected timeline for the restoration of business activity, the commodity, financial and foreign exchange markets remain extremely volatile and difficult to predict.
